Alpha School: Where learning English is just the beginning

*Managing Director **Patricia Marshall** reveals how integrity, sustainability, creativity, and innovation form the very DNA of Alpha School, shaping everything from its diverse courses to its newly refurbished, eco-conscious campus.*

Q: What do you offer students at Alpha School?
A: At Alpha School, we offer much more than just English lessons. We provide a dynamic, engaging learning experience that blends learning with sustainability and innovation. Whether you're here for General English, English for Aviation, or our eco-adventure courses, everything is tailored to meet your needs. Beyond the classroom, we focus on well-being and positive education, helping students grow both personally and professionally. We're proud to be Malta's only green-certified school, and we integrate eco-conscious practices into everything we do, ensuring a meaningful learning environment for all.

Q: Why choose Alpha over other schools?
A: Alpha stands out because our core values - integrity, sustainability, creativity, and innovation - guide everything we do. Choosing Alpha means choosing a school that truly cares about your experience. Our students love the interactive, hands-on approach we take, and the chance to experience Malta's rich culture while learning.

Our newly refurbished facilities are designed to enhance every aspect of your learning experience. We've invested in state-of-the-art classrooms and thoughtfully created distinct learning zones to meet the needs of all students.

Professionals can work in our exclusive Executive Suite, complete with a coffee lounge for networking, while children have a bright, welcoming space in our Early Learning Centre, with an outdoor play area. This setup is perfect for families, allowing parents and children to learn at the same time, in environments designed to their needs.

Q: How important is your membership to FELTOM?
A: Our FELTOM membership is crucial to us. It's not just a badge; it's a promise to our students that we maintain the highest standards in education and ethics. FELTOM's quality assurance ensures that we consistently meet best practices, reinforcing our reputation for excellence in teaching and aligning perfectly with our values.

Q: What's new for 2025/6?
A: We're buzzing with excitement for 2025/6! Following a complete refurbishment of our four-storey building, we've created a modern, sustainable learning environment. New programmes will focus on sustainability, digital transformation, and eco-adventure activities. We're also expanding our Erasmus+ professional courses, offering more opportunities for professional growth and international collaboration. Our wellbeing courses will continue to play a key role in helping students maintain a healthy work-life balance. Our mission remains to provide an unforgettable, impactful learning experience.
